

VOLVO PENTA

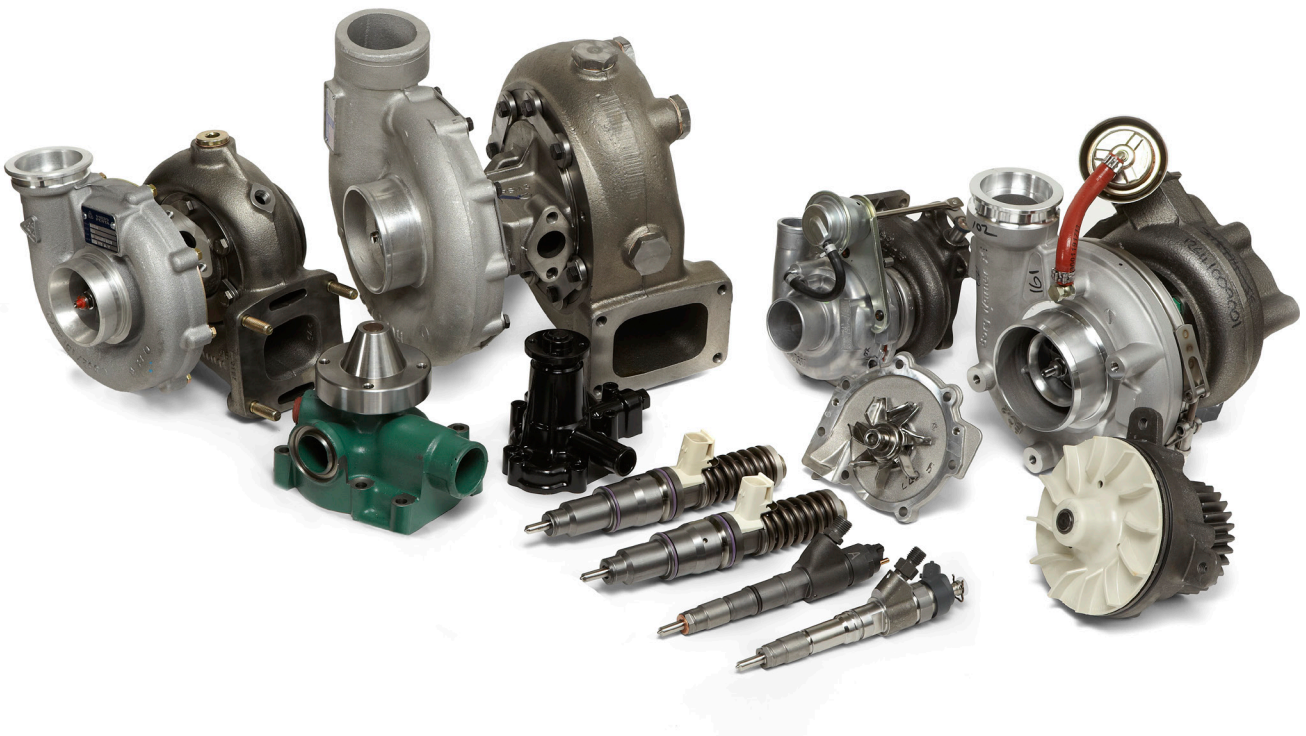

VOLVO PENTA REMAN

For industrial engines

Genuine performance, lower cost

Volvo Penta Reman components are completely restored to new condition and meet the same stringent quality and safety requirements as new parts. All components are kept current with technical design changes and are offered with the same warranty as new Genuine Volvo Penta Parts.

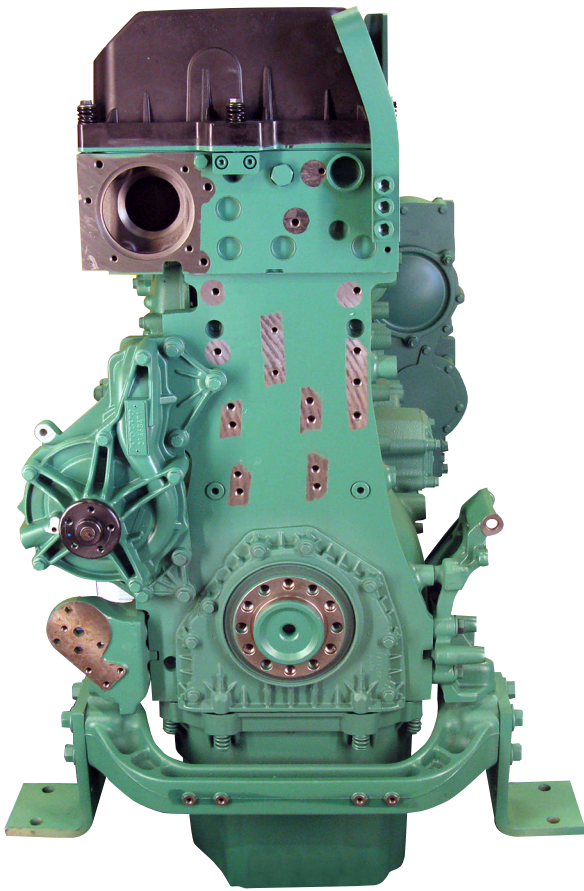

With Volvo Penta Reman components, you're assured of a perfect fit and quick Reman, as well as reduced ownership and operating costs — without compromising on quality, durability or performance.

Double your warranty

Genuine Volvo Penta Parts and Reman components are covered by our standard 12 month warranty. Have them supplied and installed by an authorized Volvo Penta dealer and we'll extend your warranty to 24 months — including the labor. Consult your nearest dealer for more details.

The Volvo Penta Reman system gives you access to a comprehensive range of factory remanufactured components & 7/8 Engines – from injectors and turbos to longblocks – offering a cost-effective alternative to repair and overhaul.

NOTE! This catalogue is a quick reference guide of the Volvo Penta Reman system.

Please always consult Volvo Penta electronic parts catalogue (EPC) for the latest information regarding Reman components.

If you are a customer, please contact your Volvo Penta dealer to order Reman components.

Remanufacturing – for good reasons

It all starts with the used component, the core, which is the raw material of the remanufacturing process. The cores are completely disassembled, thoroughly cleaned and inspected in order to determine their condition. Cores not fulfilling our stringent requirements are discarded and the raw materials recycled.

Components fulfilling the criteria are restored to what is, technically, new condition. Wear parts and those not fulfilling the criteria are replaced with new genuine parts. All components are organized to correspond to the bill of material, which contains all design changes to secure that what is remanufactured always fulfills our latest technical specifications. When the components are reassembled, they are carefully tested to verify product performance.

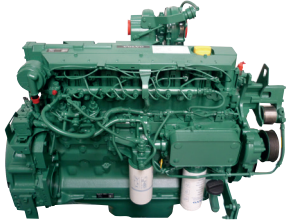

Finally, the component gets a new surface treatment, to give it the same finish as a new part.

In all aspects, Volvo Penta Reman components are technically new. And what's more - used components have been given a new life as Reman components – up to 85 per cent of the raw material has been recycled through the remanufacturing process.

Good reasons for Volvo Penta Reman components:

- Completely remanufactured to new condition by Volvo Penta
- Same quality and warranty as new Genuine Volvo Penta Parts
- Updated to the latest technical specifications
- Cost-effective alternative to repair and overhaul
- Less environmental footprint, up to 80% energy saved
- Higher uptime when choosing Reman instead of re-powering
- Lower ownership and operating costs

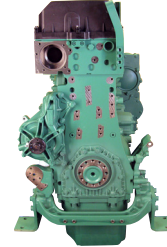

Component description

7/8 Engine

Cylinder block assembly with pistons, connecting rods, crankshaft, camshaft, cylinder head, rocker mechanism, oil pan, valve cover, intake and fuel system, exhaust manifold and turbo charger, oil cooler, circulation pump and flywheel housing.

Flywheel, alternator and starter motor are normally not included.

Long block

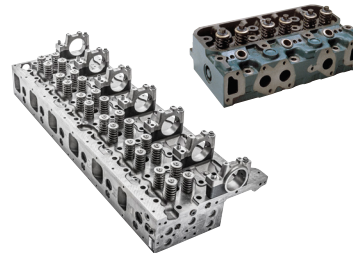

Cylinder block assembly with pistons, connecting rods, crankshaft, camshaft, cylinder heads, rocker mechanism, oil pan and valve cover.

Short block

Cylinder block assembly with pistons, connecting rods, crankshaft and required gaskets for short block replacement.

Camshaft is included, if applicable.

Cylinder head

Ready for installation with valves and springs. Camshaft-bearing housings are included, if applicable.

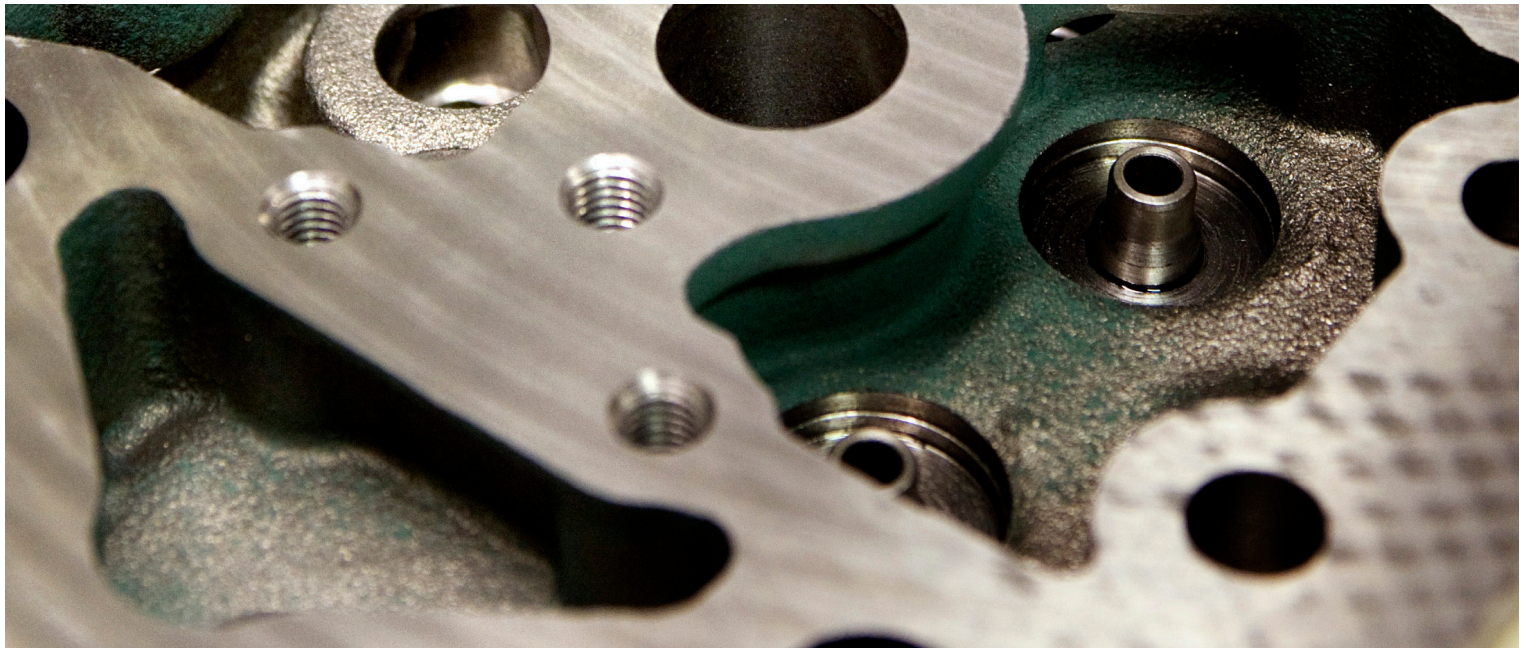

Core return

Volvo Penta Reman System is based on a recycle program where you return a corresponding worn component (the core) in return for a new Reman component. The program allows you to return the worn component once the new component is installed and the engine is running again.

Core fee

When buying a Reman component, a core fee will be added on the invoice. The core fee is refunded as soon as the worn component (the core) is returned.

Highlights

This section gives you a quick overview of vital news that have been added to this edition of the Volvo Penta Reman Catalogue.

Note! For the latest information, consult the Volvo Penta Electronic Parts Catalogue (EPC). If you are a customer, please contact your Volvo Penta dealer to order Reman components.

Industrial off-road engines (VE)

A new range of reman engines have been launched. They are more complete than previously and are easy to install with a routine in Vodia. See the parts bulletin on the part numbers for more information.
